Coleman Elks Sponsor Talented Miss Anne Bodisch, in the Coming Carnival Queen Contest

Miss Ann Bodisch

The Coleman Elks are proud to announce their candidate of the coming Carnival Queen Contest on February 3, 4 and 5. This popular Coleman girl who was born and raised in the Crow's Nest Pass, has an outstanding personality among the people of this community. Ann is a seventeen year old, five foot two inch brunette, who has a winning smile, and her vocal talent is well known throughout the Pass districts. At present, she is completing her grade eleven studies and has been the top girl tumbler of the Coleman High School. In the recreational field she is a lover of all seasoned sports and is a participant in skating, bowling, dancing, hiking and swimming. She is also an active member of the Coleman CYO group and heartily takes part in school concerts.

In the R.C.E.M.E. Band Contest a while back, this young beauty was a very close runner-up and all can recall that the other candidates had to really campaign in order to overcome her. It is sincerely hoped that the citizens of Coleman support this worthy cause. Tickets are being sold by the members of the Coleman Elks' Lodge and many close friends of Anne Bodisch.

Nurses Plan Easter Draw To Aid Fund

The Crow's Nest Pass Chapter of the Alberta Association of Alberta Registered Nurses held its monthly meeting at the home of Mrs. Anne Murdoch in Coleman last week when the ladies decided to sponsor an Easter hamper draw.

Funds derived from the \$30 food hamper will be earmarked for the annual AARN Scholarship fund sponsored each year by the Nurses who provide the scholarship for any girl in the Pass towns receiving the highest marks in high school and who plans to take nursing as her profession.

It was announced that the next meeting would be held in the hospital at 8 p.m. on Tuesday, February 2. The nurses are planning a holding a more varied social gathering at the conclusion of each meeting and in order that a more varied program be planned all nurses are requested to attend this next meeting.

* Canadians: Poetic got the Shoal Lake (Man.) Star editor: "The winds howled around the North Pole until the polar bears all went to bed with hot water bottles at their feet, and snow piled up till the lyngest cowpoke in Texas was druv to admit he'd never seen worse, but Santa Claus made his annual visit to Shoal Lake on schedule."

Mr. A. Dewar Passes Away After Lenghy Illness

Alexander (Alex) Dewar passed away on January 18th in the C.N.P. hospital after several months illness.

Deceased was born in Cardenden, Fyfe, Scotland April 22, 1880. In the year 1913, the late Mr. Dewar came to the U.S.A. where he resided until 1912. He came to Coleman and was employed at Lad-Smith, R.C., as a miner for a short time. Here, he was employed and received injuries in a mine explosion.

Shortly after this he came to Coleman where he resided until the time of his death, approximately 40 years. Alex was employed with the McGillivray Creek Coal and Coke Company as a Pit boss for 32 years and retired from this position eight years ago.

Deceased was a member of the United Church, a member of the U.M.W. of A., a Masonic Order and the Old Age Pensioner's Association.

Mr. Dewar was a man of quiet and friendly nature, devoted to his home life and a respected friend and neighbor to his fellowmen.

He was predeceased by his son Robert Walton in 1931. Left to mourn his passing are his widow, Mrs. Mary Lewar, a daughter, Mrs. R. Donaldson and one grandson, Robert of Cranbrook, B.C., a nephew, Mr. W. Dewar of Newark, New Jersey (who visited here recently).

Funeral services were held on Saturday at the St. Paul's United Church. Rev. R. MacAulay officiating. Interment in the Coleman Union Cemetery.

Pallbearers were W. Purvis, S. Murdoch, J. Park, R. Pattinson, J. Kinnear Sr., and John A. McDonald.

Card of Thanks

I wish to thank Dr. Liesemer, the Matron, Miss Helen Clemis and staff of the C.N.P. hospital, friends and neighbors for all their kind acts, also those who sent flowers and cards and those who assisted in any way during my recent sad bereavement.

Mrs. M. Dewar.

Bishop Officiates At Rites, Calgary

BELLEVUE — Funeral services were conducted in Calgary recently for the late John Carroll, father of the Rev. Lawrence Carroll of Bellevue.

Solemn Requiem Mass was celebrated January 14 in Our Lady of Perpetual Help Church, Calgary. Father Carroll was celebrant of the Mass. Rev. Father Conlough, C.S.S., was deacon, and Rev. Father Sullivan, of St. Anthony's parish, Calgary, was sub-deacon. His Excellency Most Rev. P. P. Carroll D.D., Bishop of Calgary, presided at the throne and officiated at final absolution.

Canadian Legion Sponsor Bingo

Friday evening another Bingo was held in the Legion club rooms. Lucky winners for the evening were: R. Steurbart, Mary Belish, W. Foxton, Mrs. H. M. Aslen, Mrs. A. Gettman, Mrs. J. Hopkins Mrs. W. Hurd, and Mrs. J. McDonald. Consolation winners were Irish Mullins, Buddy Clarke.

The \$45.00 Jackpot was won by J. Tröts and Dave Sudworth. Other prize winner also was J. Petuk.

Fire Destroys Celli Block

Fire which broke out at midnight Monday completely gutted the Celli Block, a two-storey frame structure on the main street of Coleman.

Through the prompt action of Ray Steurbart and Mrs. F. Puchko, tenants in the Celli Block, 11 persons can give thanks that they were awake at 12 a.m. Tuesday morning when smoke filled their apartments. Upon discovery of smoke both immediately awakened tenants and sounded the alarm. To rescue Mrs. Carol Rollins proprietor of Rollins Clothing Store, Mr. Steurbart was forced to break down the back door and carry her from the building. Mrs. Puchko ably helped and assisted Mrs. E. Richards, also a tenant in the block.

Complete details are lacking as we go to press. The entire loss and what is covered by insurance we are unable to ascertain at this time, but to your reporter the block and goods can be described as a shambles.

Celli Building Supplies has suffered a tremendous loss, what has not been touched by fire has been damaged by water. According to our information the loss is about 90%. Rollins Clothiers is a complete loss, Vet's Enterprise although not a complete loss suffered about 90% loss to fire, smoke and water. Insurance will not cover more than 60% of the loss suffered in the fire.

Tenants living in the apartments upstairs escaped with only the clothes that they were able to grab as they left the inferno.

The Canadian Legion shortly after the alarm sounded reopened to serve firefighters with sandwiches and hot coffee. Ladies of the Auxiliary responded and handled this fine effort, reminiscent of the last war when bombs and after effects brought out their finest hour. In only moments after the fire, Ladies of the Legion were on hand with hot plates, coffee pots and sandwiches appeared from who know's where and continued through out the night.

Firemen battled till late Tuesday morning to extinguish all smoldering in the building. There had been a brisk west wind blowing but slightly abated when the fire was discovered.

It was reported that a small fire had been investigated earlier in the evening in Rollins Clothiers, but upon investigation this fire to all checking had been put out. The Fire Dept. must be congratulated upon their very fine efforts, and for controlling this fire to the one building. Chief of Police Corsan controlled sightseers and traffic admirably. A more detailed personal story on this terrible fire will be in our next issue.

A great deal of thanks is due also to the Blairmore Fire Brigade without whose help the fire might have been a great deal worse.

Summit lodge A.F. & A.M. Instal Officers For New Year

At a recent meeting of the Summit Lodge A.F. and A.M. the new officers for the coming year were installed into their various positions.

Those chosen to fill the various positions were:
I.P.M. — W. Bro. J. A. McDonald; W.M. — W. Bro. R. R. Pattinson; S.W. — Bro. George Jenkins; J.W. — Bro. E. Allen; S.D. — Bro. H. Weltons; J.D. — Bro. M. Dunford; S.S. — Bro. A. McQuarrie; J.S. — Bro. W. Wilson; Tyler — W. Bro. N. E. MacCauley; Chaplain — Bro. T. Cochran; Treasurer — W. Bro. A. E. Graham; Secretary — W. Bro. H. Allen; D. of C. — W. Bro. F. Guerdar; Organist — W. Bro. S. Murdoch.

Business firms in Canada paid \$15,400,000 in corporation income taxes in 1954, a sum equal to nearly half of all corporation profits that year.

I can't think why they call it "legal tender." It's plenty tough to get, and even tougher to hold onto.

Legion Committees Plan Active Year

Plans are being formulated under the Chairman of the Entertainment Committee R. Crippen and Chairman of the Sports Committee R. Steurbart, for a well filled and active year for the Canadian Legion. Film nights will be resumed on Thursday evenings starting Thursday, February 2nd. The Bingo to be held Friday, February 3rd, promises to be bigger and better with prizes being greatly increased.

The Sports committee are planning a greatly increased program for both indoor and outdoor enthusiasts including Dart tournaments and Lawn Bowling.

Hot foot!

While investigating settler fires in the Opasatika, Ont. area, a ranger observed a number of cows grazing peacefully in a farmer's pasture. Suddenly a cow leaped into the air and high-tailed it to the barn with a series of agonized cries.

Investigation revealed that a ground fire in an adjacent area of newly-cleared land had burned underneath the ground for a considerable distance and had come up under the unsuspecting cow.

Mrs. Walter Dibblee Passes Away At Her Home Thursday

Death claimed another Coleman oldtimer in the person of Mrs. Clara Dibblee who succumbed at her home on Thursday after a long illness.

Born in Oak Bay, New Brunswick, 68 years ago deceased came west settling in Calgary in 1918. The family moved to Coleman in 1939.

Mrs. Dibblee was a member of the St. Paul's United Church senior group W. A. and prior to her illness was a very active and helpful member and was of a willing and helpful nature towards her friends and neighbors.

Surviving the deceased are, her husband, Walter, two daughters, Mrs. G. Macparratt (Helen) of Coleman and Frances now residing in Calgary, three sons, Jai of Coleman, George at Vancouver, Walter Jr. at Victoria. Two brothers in St. Stephens, New Brunswick, and two sisters, Mrs. F. Allen of St. Stephens, N.B., and Mrs. H. Robinson of New Hampshire also an aunt Miss Laura Love of Coleman.

Funeral services attended by many friends were held from St. Paul's United Church on Sunday afternoon at 3:30. The services were jointly conducted by Rev. R. MacAulay of the United Church and Rev. F. Dykes of the Anglican Church. Mrs. Dykes accompanied by organist Mrs. R. Cousins sang "Nearer My God to Thee".

Pallbearers were, F. Graham, J. Owen, P. Abousaffy, W. Purvis, F. Smith and E. Beveridge.

The remains were taken to Morris Mills, N.B., for interment and accompanied by her husband, Mr. W. Dibblee.

Card of Thanks

We wish to thank Dr. Liesemer, all those who sent cards and flowers and all those who were so kind to us or helped in any way during our recent sad bereavement.

The Dibblee Family.

To Raise Funds For Fire Victims

The Ladies Auxiliary of the Coleman Legion announce that they are starting a fund for the Fire Victims of the Celli Block. Donations to the fund will be accepted immediately and a collection will be made at the bank on Friday, Jan. 27th. Cheques should be made payable to the Coleman Fire Victims Fund. This should be a Community Objective.

Auxiliary Officers Are Installed

Installation of Officers of Ladies Auxiliary Canadian Legion 9, Coleman took place recently in Legion Club rooms.

Installing Officer was Comrade M. Drew; Vice-Pres. of Branch No. 9 ably assisted by John McDonald.

Those installed into office were: President H. Masien, Vice-President M. Clarke, Secretary P. Jones, Treasurer J. Anderson, Executive Council: E. Beddington, E. Guerdar, L. Troitz, L. Brown, L. McLeod, M. Polaki, E. Campbell, Sergeant at Arms R. Moore, Pianist J. Sprevak, Convener G. Juhlin. Following installation the Ladies Auxiliary entertained all present to a social evening, music being supplied by J. Sprevak, J. Beddington, M. Juhlin, H. Mark, B. Bond and J. Hill.

Of the 3,388,350 Canadians who paid personal income tax in 1953, only 9,260 had incomes of \$25,000 or more.

Through your Red Cross you are there when a crippled child needs daily transportation for clinical purposes.

Popular Leah Jones, a Candidate in the Crow's Nest Pass Winter Carnival

Leah Jones

The pride of the Coleman High School competing in the Crow's Nest Pass Winter Carnival at Blairmore on February 3rd, is popular Leah Jones of Coleman. This sixteen year old beauty is a trim 34-22-36, weighs 125 pounds and stands 5 ft. 4 ins. In addition, she stands second to no one, because of her striking and pleasing personality and also her outstanding participation in such recreational activities as skating, curling, horesback-riding, swimming, bowling and dancing. The C. H. S. student body sponsoring Leah, took all the above details into consideration before nominating her when the vote came up before the assembly. Tickets are being sold by the students and they are very proud to announce that one half of the proceeds will be donated to the Olive Bereckoff Fund. So the school is confident that you'll agree, that Leah will be the candidate to represent the Crow's Nest Pass.

Around The Town

• TV has invaded our community with a bang, one local dealer tells me that he just cannot find enough time to install all sets he has sold in the last week. Even tried to sell me one. Been doing a little detective work, trying to find that lost voice of a very prominent employee — we see that it's coming back to him slowly and maybe by the time we go to press he will have found all of it. Glad to see the two boys who were hurt slightly on the strip mine road out and around again. We hear of some very fine events coming up in the near future. Oldtimers are planning to meet on February 7th. Elks holding a social-nite with the ladies on Thursday. Fish and Game Association to hold a smoker next month. Yes, we hear of many others in the planning stage. Red Cross will hold their annual meeting on February 7.

The transportation committee for the Juvenile Athletic Association making final arrangements for the bus to transport two teams to Michel on Friday and there will be room for about 10 hockey enthusiasts. Ed Churla is the man to see. International Tippler's challenging Tent Strippers to a game of hockey for "Money, Marbles or what have you, this will be a game to see. Coleman Truckers claim they have no time for these sporting events owing to too much work 24 hours a day."

In Memoriam

DZUREK — In loving memory of our dear sister Annie who passed away January 16, 1954. A loving one from us is gone. A voice we loved is stilled. A place is vacant in our hearts Which never can be filled. —Ever remembered and sadly missed by Alex and Janet Kapalka and children, of Merooni, Alberta.

Beavers bear litters of two to six once a year, late in the spring.

English language probably tops all others for inconsistencies

Arabic, Chinese and Sanskrit may be difficult. But when it comes to confusions and inconsistencies it's doubtful whether any language in the world can touch the one we use.

We had a Belgian at college who had learned English in his native land. One day the Belgian volunteered that when he was learning English the one word that caused him more trouble than any other was "fast".

This was a surprise. Had any of us been asked to write a list of the 100 most confusing words in the language I doubt that the word "fast" would have appeared.

"You may say 'the horse is fast' and mean that the horse is tied to a hitching post," he explained. "Then you may say 'the horse is fast' and mean that the horse is capable of moving rapidly. Finally you may say 'the horse is on a fast' and you mean it isn't eating anything."

Chinese is supposed to be extremely difficult because the same word uttered in two different tones may mean two entirely different things.

But don't think that Chinese is the only tongue in which tonal values change the meaning of the word. We have them in colloquial American, too.

Consider the slang word "yeah" for example. In a straight answer to a straight question, it may mean simply "yes." "Are you going down town?" "Yeah."

But with a rising intonation and a question mark at the end, "yeah?" may mean "Do you really mean it?" as in reply to "She bought a \$100 dress for the dance."

Parents of teenagers may recognize another value for "yeah." This is the one delivered with a long, dismal sigh in response to such a question as "Are you going to do your homework tonight?" This "yeah" really means: "I suppose I'll have to, but I'd much rather stay here and watch television."

There are plenty of other confusions. We'll begin with a box and the plural is boxes. One fowl is called goose, but two are called geese. Yet the plural of moose should never be mooses. If the plural of man is always called men

Why shouldn't the plural of pan be called pens? If I speak of a foot and you show me your feet, And I give you a boot would a pair be called beet. We speak of a brother and also of brethren. But though we say mother we never say methren. Then the masculine pronouns are he, him and his, But imagine the feminine she, him and his. —By W. R. in Providence, R. I. Bulletin.

Sea harvest essential by end of century

As farm lands will not be able to meet future food needs of the world's population, which is expected to reach four billion by the end of the century, it is essential to harvest the food in the sea.

This point is stressed in the *Unesco Courier*, published by the United Nations Educational, Scientific and Cultural Organization.

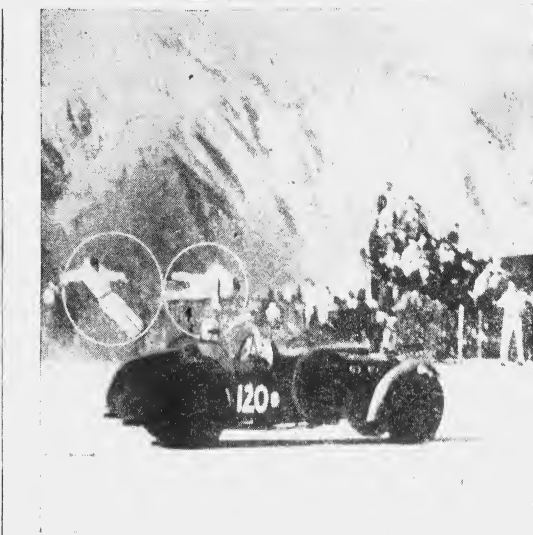

Today, it says, man gets only one percent of his food—fish and marine plants—from the sea—the annual yield—not counting whales—being about 26 million metric tons. If fishing methods were improved, both yield and consumption could be multiplied.

More use of the sea's plant life is also urged to feed both men and domestic animals. A single square mile of sea produces 13,000 tons of vegetation in an average year.

The sea can supply much-needed fertilizers, too. Each of its 228 million cubic miles holds 5.50 tons of nitrogen, 225 tons of phosphorus and nearly two million tons of potassium.

UNESCO is organizing a broader international attack on the problem of the sea. It has approved a world-wide programme of aid to oceanographic research in accord with the Food and Agriculture Organization, and has set up an advisory board on marine sciences.

Beginnings of agricultural fairs can be traced back to Old Testament times.

NARROW ESCAPES FROM DEATH—Two volunteer flagmen (center) at Palm Springs, Cal., are hauled into the air by the impact of a sports car during a road race. One of the men suffered a broken leg while the other managed to escape with only two broken ribs.

Proves value protein diet

If the pupils of St. Conrad Separate school of Ottawa become especially plump and good-natured, give the credit to four white rats and Sister Marie Alphonsine.

Some weeks ago Sister Marie Alphonsine, Home Economics teacher, acquired four 23-day-old white rats, each weighing 40 grams.

Two were fed lunches that included such goodies as jam, cake, potato chips and soda pop. After a month of this diet they are, a snappish, all-humored pair, weighing a mere 90 grams.

The other two are a plump 170 grams and bursting with health and good temper after being fed a balanced, protein-packed diet such as carrots, cheese and milk.

Sister Marie Alphonsine said she conducted the experiment with the help of pupils to impress on them and their parents the need for well-balanced box lunches.

Hawks shut out 20 times in the 1928-29 season

After Toronto Maple Leafs had been shut out five times in their first 15 games this season, a number of people started to enquire: "What team was shut out the most times in one season?"

It took some digging as that is one facet of hockey that hasn't been written about too much in past years. It was discovered that the record was set in the season of 1928-29. That was the season when more shutouts were recorded in National Hockey League play than at any other time.

Chicago Black Hawks were shut out 20 times in 1928-29. The club played a 44-game schedule that season which means the Hawks were kept off the score sheet in almost half of their games. They won eight games in succession without garnering a goal in February, 1929. They were shut out on February 7 in a game against the New York Americans and failed to score a goal until March 2, eight games later, when they failed against the Montreal Maroons.

Pittsburgh had a team in the N.H.L. in 1928-29 and they were close on the heels of the Hawks in number of times being shut out. Pittsburgh were blanked 18 times in 44 games in 1928-29. That was the same season that George Hainsworth of Canadians set a National Hockey League record for most shutouts in a season by a goaltender. He had 22 shutouts in 44 games, a record that will never be broken.

There were 120 shutouts recorded in the 1928-29 season by the 10 clubs in the League, which is the greatest number for any one season. The 1927-28 season also saw a large number of shutouts. Pittsburgh were blanked out 15 games that season. That was also the season that Alex Connell, goalie of the Ottawa Senators, won six games in a row without allowing a puck to get past him.

Last season three clubs were tied with being shut out the most times. They were Chicago, Toronto and New York. Each team was 36 shutouts registered in the N.H.L. last season.

The part of the potato plant that we eat—the potato itself—is a tuber that develops underground. A tuber is not a root or a bulb but a fleshy stem bearing a number of buds or "eyes," which when the time comes, develop into sprouts.

Western attitude threatening status Chinese mother-in-law

Western brides who look with apprehension on acquiring a mother-in-law have little to complain about by Chinese standards.

The first thing that a Chinese girl asks, when congratulating a friend on her engagement, is a whispered: "You kar phoo mah?"

"Is there a mother-in-law?" For next to the husband, and sometimes before him, the most important person in a Chinese bride's life is her spouse's mother. Economy, mild piety and a devotion to pleasing the old lady are accepted as unbreakable.

There are still in existence in the "enlightened" Chinese society of Singapore, mothers-in-law who insist, as a right that their son's wife should rise before the rest of the household, do the laundry, clean the house and prepare breakfast before anyone else is awake.

Hot water for washing and a cup of coffee as a mark of respect from the bride also are expected. Live with uncles' parents, Chinese tradition, adhered to partly from respect and partly because of Singapore's housing shortage, demands that the young people live with the men's parents, as do all his brothers and their offspring.

In the old days, there was little friction. The girl knew what was expected of her and dared not lose face by having her upbringing criticized if she failed to meet her mother-in-law's exacting standards.

But younger people, fed on American and European films and

mixing with Westerners, are beginning to see that the word "family" should apply basically to a man, his wife and their children.

The struggle between the traditional view that the bride must live with her husband's people and the "we want to live alone" Western attitude is making headlines in Malayan courts in divorce cases.

Girls have complained that some mothers-in-law torment them by jeering at their husband's unfaithfulness and even badger their sons into taking second wives partly to hurt the first wife but also to bring another unpaid servant into the household.

WOMAN!

Ricardo Maria Romano, 23-year-old former army sergeant, may have to postpone his wedding—because "officially" he is a woman. He found out recently when he went to the town hall to inquire about a marriage licence and the clerk told him he was registered as a woman. A clerk who registered his birth was misled by the second name Maria.

Fashions

Sizes up to 50

by Anne Adams

Sizes up to 50 will enjoy the good looks, comfortable fit of this new sleep-time style! Dress-length or long-length nightgown, pretty trimmed with lace and bow! Easy-sew a whole summer wardrobe from this pattern—very neckline and sleeves for your "found wear!" Pattern 4807, Women's Size 36, 38, 40, 42, 44, 46, 48, 50. Size 36 takes 4 1/2 yards 33-inch fabric.

This pattern easy to use, simple to sew, is tested for fit. Has complete illustrated instructions. Send thirty-five cents (35c) in coins (stamps cannot be accepted) for this pattern. Write plainly for name, address and style number and send orders to:

Department P.P.L., Household Arts Department, 60 Front Street W., Toronto

'Neighbor' has new meaning for widow

The word "neighbor" has taken on a new meaning in Sandwich East township near Windsor, Ont., for Mrs. Arthur Vanderbeck.

Her house burned to the ground several weeks ago. From the chaos of a succession of tragedies for the woman with three dependent children.

Her husband, ill for three years with cancer, died a little more than two years ago and it took her two years to pay for the cemetery lot and headstone.

She made the final payment and the next day, while visiting the cemetery, her house burned down. All her clothing, food and farm time were destroyed.

The \$3,000 insurance wasn't nearly enough, and that's when the neighbors stepped in.

Neighborhood efforts were a little unorganized at first. A card party raised \$1,000.

Fred Moore, a service station operator, decided labor would be the main expense, so the community organized a collective do-it-yourself effort. They have nearly finished a three-bedroom home without a cent for labor.

A contractor donated material for a foundation and another one put in a five electricals spent one day each. Eighteen men put up the frame and shingled the roof in six hours. Another gang did the insulation.

GAY KITCHEN AIDE

Keeps you neat and pretty, easy to make

by Alice Brooks

She's a wonderful helper when company comes—a gay "girl" answer to kitchen maid and pretty! Easy, fun to make—use scraps!

Pattern 7210: Gay kitchen aide! Embroidery and applique transfers, easy to write, plain sewing this cute apron, 16 inches long. To obtain this pattern send twenty-five cents in coins (stamps cannot be accepted) to:

Department P.P.L., Household Arts Department, 60 Front Street W., Toronto

Be sure to write plainly for name, address and pattern number.

Order on ALICE BROOKS Needlecraft Catalogue. Enjoy pages and pages of exciting new designs—knitting, crochet, embroidery, non-sews, toys and novelties! Send 25 cents for your copy of this wonderful book now. You'll want to order every design in it!

Hand lotion in a bottle with a spray top is handy and less wasteful. For cold weather use there is an excellent lotion which contains lanolin, lemon and glycerine—it whitens, it softens, and protects the hands.

Always aim for the natural look in your makeup, always keeping in mind that the cosmetics best suited to your type of skin and your coloring are best for you.

A task rag is a treated wiping cloth that picks up fine dust and particles that an ordinary cloth will not remove. It may be purchased at automobile supply shops and some paint stores. To store a task rag, fold it and wrap in aluminum foil or place it in a very small jar with a tight lid. Task rags make excellent dust cloths for furniture.

Helpful Hints

Jane Ashley Says

"Try my favorite recipe for the month"

CRANBERRY-APPLE PIE

¾ cup granulated sugar
3 tablespoons BENSON'S or CANADA Corn Starch
1 teaspoon salt
¾ cup CROWN BRAND Corn Syrup
¼ cup water
1½ cups cranberries
1½ teaspoons grated orange rind
2 tablespoons butter
1½ cups chopped apples

1 recipe pastry
MIX sugar, BENSON'S or CANADA Corn Starch and salt in saucepan.
ADD CROWN BRAND Corn Syrup and water gradually; mix well.
COOK over medium heat, stirring constantly, until mixture thickens slightly and comes to a boil.
REMOVE from heat, add orange rind and butter. COOL; add chopped apples.
PREPARE pastry; roll ½-inch thick.
LINE 9-inch pie pan with the pastry; pour in filling. ARRANGE lattice of pastry strips across top. SEAL edges well, flute, if desired.
BAKE in hot oven (450°F.) 10 minutes; reduce heat to moderate (350°F.) and bake 40 minutes longer or until apples are tender.

Age of seven best time to start music

Calgary music teachers feel that a child should be at least seven years before starting music lessons.

Miss W. G. Egbert, one of the teachers, says the method of teaching children in schools today is of little use to the younger child starting to take music.

"The old system taught them the sounds of letters, which was a big help to beginners in learning to read music," she adds. "At any rate, a child is more adept in studying piano if he has been at school at least a year."

Miss Jean Evelyn said there are some exceptions. "But if a child is in grade 3 in school when he begins music lessons, he will get along like a house on fire."

Varied opinions

Jack Hutton said he thought a child should be nine or 10 years old before starting.

"If they start too early, they lose interest and many children even develop a strong dislike for the piano. Of course, a great deal depends on the teacher."

Another teacher, Miss Joyce Hawcutt, said the child of five who has a talent for the piano needs almost constant supervision at home to ensure continued progress.

She said she does not like to accept children under seven.

Miss Mary Munn said: "If a child of five is unhappy at just pushing notes from a piano—and the musical child is—he should receive training."

"However, lessons must be short and simple, and the child should have an experienced teacher. It is better to put this type of child's intellect and talents to use early."

Mrs. L. Kline, as well as giving an opinion on minimum ages for music students, said they should not be started too early.

"If children start any later than eight," she said, "by the time they are in their teens they become discouraged because they are still playing juvenile pieces."

Some truths in 'tales' of epic journey

Few tales of epic journeys in early North America are less known or more incredible than David Ingram's 3,000-mile hike in 1959 from Mexico's Gulf Coast to Saint John, N.S.

National Geographic Society says Ingram told examiners of his trip and his accounts were published later by the English geographer, Richard Hakluyt, who died in 1616. The stories were later dismissed as sheer fabrication.

Yet today many historians believe Ingram's tales were based on a certain degree of truth. History shows that in October, 1559, about 100 of Sir John Hawk- ing's English crew members went ashore on what is now Tampico, rather than starve aboard. Only five of them returned to England, killed by Indians.

Ingram's smaller group headed north, and most were killed by Indians. Survivors reached a river 60 leagues west of Cape Breton, Cape Breton Island, N.S. There they found a ship, the French Gargonne, which accounts said was captained by "M. Cham- pagne."

The society hastens to explain that this was not Samuel Cham- plain, who was still an infant at that time.

By the end of 1569 Ingram was with two others was back in England. Queen Elizabeth's lieutenant, Sir Francis Walsingham, chamed upon Ingram 13 years later, by which time the sailor had had plenty of time to add fiction to fact.

Ingram told of seeing elephants "twice as big as a horse," of people using iron tools in great villages up and down the continent, of Indian kings wearing rubies "VI inches long."

But Ingram's description of the great bays and rivers he crossed of "great playnes and greates and huge woodes," compared roughly with the topography of eastern North America.

On the other hand his trip took 11 months, an average of more than eight miles a day, a pretty fast clip for wilderness travel.

Joy runs wild over pink slips

Mount Joy, Pennsylvania, is one town where joy really runs wild when it comes to parking tickets.

City council decreed that policemen must slip a nickel into the meter for the overparked motorist and leave a pink notice under the windshield wiper.

All the motorist has to do is return the notice to the burgess with five cents to ward off a one dollar fine.

Nine ways to play better basketball

Here are nine simple tips that can help you play better basketball this winter. Some of them may seem pretty fundamental, but check your own play against this list next time you are on the court and see if you don't violate at least one of these rules consistently.

1. When you are faking, feinting or manoeuvring with or without the ball, always have a plan.

2. Ask yourself "why?" Every time you make a move and it doesn't work, try to figure out the reason. Only by studying such failures can you help yourself improve. "Why?" is the athlete's most helpful ally.

3. Never break or start forward for a pass unless you are sure your teammate is ready to pass. If you move too soon, you may give away a good play.

4. Pass and move around quickly. The faster you and your team keep the ball moving, the harder it will be for the opposition to break up your plays.

5. After you pass, cut for an opening. Don't stand around admiring the play—get into position.

6. Shoot every time you have a good opportunity, and follow your shot for a rebound.

7. If you can't throw a successful pass, dribble or make a shot—hold the ball. Better a held ball than a wild throw or dribbling attempt. Don't give the ball away.

8. As soon as you get the ball, check your teammates. One of them may be in a better position than you.

9. Keep cool. This above all. Make every movement count. And remember that there are other players on the team and that their points are team points too.

10. Jesus compared the kingdom to treasure hid in a field, which a man sold all that he had to buy; and to a pearl of great price, which, likewise, a pearl-merchant, knowing pearls and their value, sold all that he had to buy.

Do we value the Kingdom of God in that way? Is there realism in what Jesus said? Jesus did many wonderful works, but all these He spoke of as secondary or unimportant in comparison with the Kingdom itself, which He offered to all those who would repent of their sins, and become as little children. The supreme treasure of the Kingdom is salvation. The greatest words that Jesus ever spoke were: "Son, thy sins be forgiven thee."

In our modern world we have become very polite and squeamish in avoiding talk about sin and salvation. Yet sin is the most terrible fact to be reckoned with in our lives.

And salvation is the supreme treasure which Jesus brings within our reach. What treasure we should have, and will have, if we live in the spirit of our daily prayer: "Thy Kingdom come!"

Governor General composes ode to 'Saucy Sally'

Governor General Vincent Massey, who has something of a reputation as a writer of prose, has tried his hand at verse.

The navy has disclosed that the governor-general has written an ode to the Saucy Sally, the motor cutter of the frigate Buckingham.

Mr. Massey travelled frequently in the Saucy Sally last summer when he visited several Newfoundland outposts and St. Lawrence river and gulf ports. The cutter provided the link between ship and shore when there were no berthing facilities for the Buckingham.

The ode to the Saucy Sally as penned by His Excellency: On board the frigate Buckingham there hung a little craft As nimble as a kayak, as buoyant as a raft; The passengers admired her; travelled in her at each stop; And called her "Saucy Sally" with the fringe on top.

For she carried very proudly a magnificent decor— A fringe she had onships, and also art and foie.

The passengers adored it—what the actors call a "prop"; And they loved the "Saucy Sally" with the fringe on top.

When we called at Entry Island the wind grew even stronger And our journey the jety seemed long and getting longer. We whispered soft as sea's ebb high and spirits took a drop, What about it, "Saucy Sally" with the fringe on top?

But she did her duty nobly, and never let us down, Returned us to the Buckingham—and how she went to town!

The waves she scored superbly, with a jump and skip and up, So thank you, "Saucy Sally," with the fringe on top.

Termites live in vast communities in the tropics. Their homes sometimes reach a height of 12 feet and are built so strongly that a person can stand on them.

2. Ask yourself "why?" Every time you make a move and it doesn't work, try to figure out the reason. Only by studying such failures can you help yourself improve. "Why?" is the athlete's most helpful ally.

3. Never break or start forward for a pass unless you are sure your teammate is ready to pass. If you move too soon, you may give away a good play.

4. Pass and move around quickly. The faster you and your team keep the ball moving, the harder it will be for the opposition to break up your plays.

5. After you pass, cut for an opening. Don't stand around admiring the play—get into position.

6. Shoot every time you have a good opportunity, and follow your shot for a rebound.

7. If you can't throw a successful pass, dribble or make a shot—hold the ball. Better a held ball than a wild throw or dribbling attempt. Don't give the ball away.

8. As soon as you get the ball, check your teammates. One of them may be in a better position than you.

9. Keep cool. This above all. Make every movement count. And remember that there are other players on the team and that their points are team points too.

PIXIE—Edna Whimsey is a toned into this pointed bonnet. Buttoned straps of matching felt gather the stretched panels together in this casual London creation. Unbuttoned, hat has a practical aspect. It folds flat for easy packing.

Fails to respond after 10 hours

Doctors fought unsuccessfully for 10 hours at the Royal Melbourne hospital, Melbourne, Australia, recently, to save the life of nine-year-old John Fitzgerald, who was found unconscious in eight feet of water during a Cuh-Soot swimming party.

When he failed to respond to artificial respiration, he was rushed to the hospital where his chest was opened and his heart massaged for four hours before it began to beat normally.

But his lungs, which were kept working mechanically, finally collapsed and he died.

Specialists rated the resuscitation effort the longest in their memory and said if the boy had recovered it would have made medical history.

Modern bank book had forerunner in 18th century

Today, we seldom hear of anyone stashing large sums of money beneath the kitchen floor-boards or inside a mattress. But in the early pioneer days these were the only "banks" available to many people.

Along with improvements in our banking system has come that important item, the "passbook." The passbook is the statement and proof of one's material wealth and in fact, the only receipt the bank gives to its depositor.

Books for recording savings were in existence as early as the mid-18th century, but these looked very different from the passbook of today. Often bound in soft leather, they were a joy to behold, but not very practical for widespread distribution.

Today's passbook is usually covered with a bookbinding cloth, specially treated with a plasticized coating to create a durable and dirt-resistant cover. The case in which the book is kept is made of the same material.

The first "bankers" of history were the goldsmiths who kept the material of their trade in large iron boxes for safety. In time, people began to take their valuables to the goldsmith for safekeeping and he would put them in his

strong iron box. In return they got a receipt which was the forerunner of the modern passbook.

WHY NOT SEE COUNCIL AT WORK ?

From time to time the opinion is expressed that more members of the general public should attend the open meetings of city council. It is not only a sign of interest in public affairs if citizens avail themselves of the opportunity to see their representatives deliberating the affairs of the city, but their presence in the council chamber is stimulating to aldermen who, too often, feel that their work is taken for granted by the general public.

Attendance at council meetings is valuable for the onlookers. It enables them to appreciate the large amount of work with which the council has to deal and also to assess the quality of the men elected to do the work.

It takes two years to make a good alderman, in the sense that it takes that amount of time to acquire a sufficient background and knowledge to deal intelligently with all the problems which arise. It is not to be supposed, therefore, that the general public can attend council meetings and understand all that transpires. Nor, from a spectators point of view, are council meetings particularly interesting. The work of the council, which to its members is so vital and so interesting, appears to the onlooker to be somewhat colorless. Nevertheless, at least once in a while, every citizen should attend a council meeting if only to know how this democratic body works.

GRAVY TRAIN

Almost every day the newspapers report that workers in the big automobile, steel or agricultural implement plants have won another big increase in pay, and that prices will go up accordingly. To the rest of us — especially those on pensions or fixed incomes — those workers seem to be riding the gravy train. What will happen to the rest of us?

Instead of a gravy train, most of us will be riding an economic merry-go-round that spins far too fast. By the time the farmer sells his grain (most of it to countries where wages are lower) the price of the implement he needs and the trucks he has to buy will have jumped to meet new wage demands. While the merchant in big industrial cities may do all right, the small-town merchant takes a licking — he buys his stock from manufacturers paying sky-high wages, but must sell it to farmers or small-town white-collar workers, who don't get union rates. Many retailers are now operating on a ridiculously low profit margin. And pensioners are suffering terrible hardships.

No wonder young fellows leave farms to take factory jobs at high pay! Everybody likes to ride a gravy train. But there is something Canadian union workers have forgotten.

Gravy trains can get wrecked. The Canadian unions may succeed in getting a guaranteed annual wage and wages equal to those of the U.S.A., and all sorts of fringe benefits. But since this is NOT the U.S.A., and we don't have a big domestic market — they'll get something else. If they keep on the way they are, they'll get a depression as sure as you're born. And then they'll blame it all on Wall Street. But this time, the rest of us will know where to put the blame, and the unions will lose everything they gained.

The sooner Canadian unions start to run their own affairs instead of letting the big American union leaders boss them, the better it will be for them and for all of us.

OF MANY THINGS (By Ambrose Hills)

The other day I showed a politician an editorial that roasted him properly. He glanced at it, the mashed, then grinned. It didn't seem to bother him. "It would have," he said, "if it had appeared in my hometown weekly. That gets read, by everybody in the family. But they don't bother much with the daily — few read the editorials."

I think the reason is that dailies tell too many editorials, and write them too fast. As a result, they sometimes seem a bit superficial. For example, the Globe and Mail, a top-flight daily, ran an editorial on December 31 called "Years of Bounty". It started well; but as the writer warmed up (or speeded up) he seemed to me to get zamer and zamer.

He wrote: "The arts — music, drama, ballet and the rest — are perpetually poverty-stricken in this rich country. Should we not allocate them a generous fraction of next year's \$24 billion? One-hundredth part of that would seem to them princely."

It should! It comes to something like \$280 millions! That's more than the total budget of the City of Winnipeg. When a newspaperman makes a suggestion as wild as that one, what could we expect of a long-haired Canada Council such as the Massey Commission recommended?

I can't imagine a weekly editor pulling a boner like that. To begin with, a weekly editor not so impressed with the richness of this country, because he knows many of his readers don't have indoor plumbing or many other facilities. And he is not sure we would get very much true culture by big subsidies. Many editors are inclined to distrust forced-feeding of culture, whether it comes from the CBC, the NFB or a Canada Council.

But to suggest a subsidy anywhere close to \$280 millions is absolutely silly. That writer needs to visit his country cousins once in a while!

Alberta Tuberculosis

The Christmas Seal Campaign for Lethbridge and District is still \$3,100 short of the objective, according to Mr. R. J. McCulloch,

chairman of the Lethbridge Kinsmen Club TB Christmas Seal Sale committee.

Mr. McCulloch reports that the Alberta Tuberculosis Association requires \$25,000 to meet the provincial objective and the books will be kept open for a while longer to give those who wish to do so an opportunity to send in their contributions. He says, "It would be unfortunate if the work of the Association was hampered through lack of funds. The annual sale of Christmas Seals is their only method of raising money throughout the year. There is no personal canvass and the Association does not receive any money from public or private agencies". The importance of early case finding may be brought to the attention of the public by pointing to the result of surveys by the Christmas Seal Mobile Chest X-ray Unit operated by the Association in co-operation with the provincial Department of Public Health. In one routine clinic held recently, attended by 716 people, 8 new active and 10 inactive cases of tuberculosis were discovered. With such pockets of infection as this in our midst, it should be readily realized that there must be no relaxation in control measures.

Contributions may be sent to the Lethbridge Kinsmen Club TB Christmas Seal Sale committee, City Hall, Lethbridge, Alberta.

Advertising...

★ ★

Modern advertising is a necessity to hold and build business. Be proud of your business, of the goods you have to sell, of the services you have to offer in your particular line. Show the progressive spirit and the desire to serve by advertising. Do not hide your light under a bushel — proclaim far and wide who you are and what you have to sell and where your place of business is, for public memory is short, and advertising is a powerful aid to all types of businesses. Moreover, people as a general rule shop where they are invited.

Pass Mines Continue To Work Full Time To Meet Increased Demands For Coal

All mines in the Crows Nest Pass are working full time and the production of coal has increased considerably. Certified miners are urgently needed at Michel and Fernie mines of the Crows Nest Pass Coal Company. The severe weather across Canada has created a heavy demand for coal. The mines of the Crows Nest Pass at Fernie and Michel have been operating on a full time basis for some time and it is anticipated this will continue through

1956.

The mines on the Alberta side have been in full operation since the middle of October, and orders are good. To meet the emergent demand for coal, Coleman Collieries have expanded their operations by re-opening the Tent Mountain strip mine and putting on a considerable number of trucks on the coal haul. More of these trucks are required, particularly of the tandem type which are more suitable for the conditions on this particular coal haul. These trucks

are hauling 24 hours a day to meet the urgent demand for coal.

BIGGER PAYROLLS

The Crows Nest Pass in general has experienced a sharp lift in the full time mine operations and payroll expansion. The logging and lumbering industry is much handicapped by the heavy snow falls which prevent logging operations and hauling. There is considerable lost time of the employees due to weather conditions.

Meanwhile the National Employment Service offices at Blairmore have swung into the "Do it Now" campaign. This Canada-wide campaign by the NES is to

encourage everyone from large business concerns to the housewife at home, to get needed projects done. The manager and employment officer of the Blairmore local office of the NES are touring the area from Fernie east to Pincher Creek encouraging all to participate in this "Do it Now" campaign. F. J. Lote, manager of the Blairmore office, states that at present there are some 40 general male laborers to 60 female applicants seeking work. The female workers are composed of stenographers, cooks, waitresses, and chambermaids. There are a considerable number of lumber and sawmill workers on part time who would be available and would appreciate an odd day's work. Now is the time to get these odd jobs done, it is said.

Mr. Lote states that due to the present steady operation of the area are not serious, but full employment is desired and participation by everyone in this Canada-wide "Do it Now" campaign will help materially in making the Pass a thriving area. Claimants for unemployment benefits are at the lowest point since 1951 due to a large extent to the full time work at the mines.

The local special unemployment committee of the NES comprised of a full representative body of the area meet monthly for discussion of all employment problems seeking ways and means to maintain full employment and to encourage the development of industry. This committee is comprised of the following citizens: Chairman, F. J. Lote, manager of the NES office; secretary, J. J. Yanota, employment officer NES; Frank Abousally, mayor of Coleman; Mayor William Gray, secretary of the Blairmore local of the UMW; P. VanWyck, manager of the Burns Lumber Company; L. L. Moran, proprietor Crow's Nest Pass Motors, and Vern Decoux, Pass representative of the Lethbridge Herald. Invited guests for all meetings are William Kovach, M.L.A. of Hillcrest, and J. F. Hogan, superintendent of the forestry conservation board Blairmore.

This committee's activities over the past year have done valuable work for the betterment of employment conditions and progress of the Crows Nest Pass and their efforts have been recognized by both the provincial and federal governments.

Jehovah's Witnesses Assembly

This news release contributed by W. L. Krishi

Jehovah's witnesses from seventeen congregations in Southern Alberta are gathering for a three day convention at Fort Macleod Jan. 27, 28, and 29th.

Ten of the witnesses from the Coleman congregation are leaving on Friday for the assembly. These will be joined en route by the others from Frank, Lundbreck and Pincher Creek. Among those leaving are Mrs. William Fairbrother and son Bruce, Mrs. Vince Konduchowicz and family of Coleman, Mrs. W.B. Rhodes of Lundbreck and Mr. Roberts of Pincher Creek.

The Watchtower Bible and Tract Society of Toronto will sponsor this assembly. The convention, which will be held in the High School Auditorium at Fort Macleod, is for Bible instruction and concentrated Gospel preaching in this area, spokesman for the group said.

A similar circuit meeting, representing fourteen congregations was held a year ago at Lethbridge at which 600 people gathered. It is expected 600 will attend the Fort Macleod gathering.

All three days of the assembly will consist of morning, afternoon and evening sessions of Bible talks, discussions and demonstrations which are open to the public without charge.

Mr. A.F. Danley, of Toronto will appear on the program all three days and will deliver the main public address at 3 p.m. Sunday January 29. His subject will be "Overcoming the Fears of the Generation."

Delegates from High River, Brooks, Medicine Hat, Leth-

bridge, Coleman and intervening points are expected to attend.

Letter from Egypt

Dear Folks,

I hope that you haven't given up hope in hearing from us, we have been busy, as Christmas is about as hectic here as it is in America. Santa Claus was very good to us all, Harold and I decided to pool our money, instead of getting ourselves separate Christmas gifts, to get something we both really wanted, and as the result we got ourselves a typewriter. I now have a regular typing book, and will proceed to learn the touch system again, as I have lost the knack of it with lack of practice. With all the sunshine and flowers, it is very hard to get the Christmas spirit, but just as soon as the sun goes down, it is the same all over the world — parties galore and more drinks than you could shake a stick at. We attended quite a few of them, but remained peaceful. The kids woke up at 5.30 in the morning and we can't be up very late and get away with it. The boys got two-wheeled bicycles with temporary side wheels which can be removed when they have learned to ride with the two, so far they are still on the three wheels. They also received the usual bunch of stuff, such as cars, etc., tool kits had to be confiscated, because Steve conked Danny on the head with the small hammer and almost made a dent, it wasn't anything serious but will be if I don't take the things away. Christopher Paul also received the usual line of baby stuff, but seems to be happier with a couple of old tin cans, so all in all it is just a waste of money getting toys. This baby is going to be the actor of the family, he is getting to be a regular screw-ball, he dances the hootchie-kootchie with Salha, can sing, and say about four words in Armenian, talks all day long to Salha in Arabic, and to me in English. He is always ready to put on a show for anyone, and is even funnier than Danny. Danny is a dreadful tease and is always picking on Steve and I can say that sometimes I hardly blame Steve for trying to conk him on the head. He deliberately tantalizes Steve, then runs off into a corner and cackles to himself, because he knows that he has got Steve's goat.

Thank goodness that school starts Monday, after going to school in the mornings for the last three months they find it quite boring, hanging around. They have uniforms, which they go to school in, and they look so cute. Both Steve and Danny speak Arabic fluently, they have the rest of us beat a mile, and I think that out of all the American colony, they are the only ones that can do so. I sure had a mess in the house the other day. We put our kerosene stove in the bathroom to heat it up a bit, this particular stove works very well ordinarily, without any smoking or smell, but one has to be sure it is on a level floor. There are legs on it that are adjustable, and can be fixed if the floor slants a bit. I had forgotten to tell Harold about this and he moved it into the bathroom and set it down where the floor fits down to the drain, he closed the door for the room to warm up. About ten minutes later I opened the door and saw flames, I was also greeted by a blast of pitch black smoke. Harold dashed into the room and opened the window, and when he came out he was all black. There was no damage done, but I sure wished you could have seen the room, every linen of it was black, nothing was missed, even to the bristles on the toothbrushes. Fortunately for Harold, he had to go back to camp the next morning, but would have nothing to do with it, and Shahada the gardener also looked at it skeptically and said it was impossible to do anything with it. Well, I got started, it was a hard job, but with two boxes of soap and about 150 buckets of water, I finally made it. The ceiling was impossible, so I could only wipe it, and I am now in the process of painting it. Well to top this all, while I was cleaning this mess, Salha was washing clothes with the washing machine, when I went over to see how things were going on with her I find her washing Harold's good suit pants in the machine. If anyone ever mentions the word maid to me when we get back to America I will hit the ceiling, they sure are not worth a darn. I wish you could have heard Harold, about Egypt and stoves, if there was a plane leaving at the moment, I think he would have been on it. We are quite disgusted and can hardly

wait to get back home, the time has gone fast, but we are hoping that the next few months go even faster.

I now own a Marilyn Munroe dress — it's black with a silver of green sparkly thread going through here and there. It really fits where it touches, and looks very good (Harold says so) if he says so, it must be, as he is a very critical gentleman when it comes to dresses. I have very lovely jewellery to match. It was made by a very good dress-maker, she comes to the home to sew, and thus anything made by her fits like a glove.

When our contract is over, we will be heading for home, we plan to take Scandinavian Airlines which will take us to Winnipeg first then to Lethbridge. Well folks I will now close with our best wishes to you all for a very Happy New Year.

HAZEL.

MORE MORTGAGE MONEY

Mortgage money is expected to remain plentiful despite the current tightening of credit and the still large volume of construction.

That's the consensus among insurance officials, bank experts, and other mortgage lenders contacted by The Financial Post. They say there is still plenty of money available for housing mortgages, for instance, even though there have been 125,000 houses started this year and even though higher interest rates in other sectors may spread to the mortgage field.

WHEELCHAIR GIRL REMARKS—F. L. Michael Cross stands beside his bride, actress Pamela Russell after their wedding at Caxton Hall, London. Miss Russell, well known to British television audiences, broke her back in a riding accident in 1953. She met F. L. Cross while in hospital where he was also being treated for a broken back. Her previous marriage was dissolved last June.

POOHED—Travel sure takes it out of you. Take the word of Wolfgang Zeller, 10 months old, left, and one-year-old Bela Molnar, right. Played-out Wolfgang is pictured in a porthole as his ship arrived in New York City. His parents will make a new home in Cleveland, Ohio. Bela and her twin sister, who had enough squirms left to get out of camera range, hail from the Austrian Tyrol. Mom and Dad are making a new home in Chicago. The children were among 1,215 refugees who recently arrived in the United States under the Refugee Relief Act of 1953.

THE 150th ANNIVERSARY of France's battle of Austerlitz is celebrated in the traditional manner as first year university students get down on one knee in Paris and sing their national song.

BIGGEST PRIZE WINNER IN TV HISTORY—Master of ceremonies Jack Barry hugs Mrs. Ethel Park Richardson, 72-year-old Los Angeles woman, after she correctly answered a six-part question about folk songs to win \$100,000 on the "Big Surprise" show. It was the largest prize in the annals of radio and television giveaway shows.

ALL'S WELL THAT ENDS WELL—TV actress Nanette Fabray, confined to a New York hospital since suffering a head injury on the Sad Scream show November 28, smiles as she leaves the institution. Her eyesight was temporarily impaired when she was hit by a falling pipe during the show.

IT'S A SMALL WORLD—Soviet comrades Khrushchev, left, and Bulganin, right, meet a Rhode Island "Red" rooster in far-off India. Russian party chief and her premier were visiting a state-operated farm at Bareilly, one of many stops on their Indian itinerary.

SCENES FROM NAVY'S SCRAPBOOK—These photos portray something of the Royal Canadian Navy's progress, travels and developments in 1955. Reading clockwise from centre left: An outstanding event was HMCS Labrador's five-month voyage in the Eastern Arctic. Aiding considerably in the ship's operations were her three helicopters. . . . The training cruiser, HMCS Quebec, became the first Canadian warship to circle the continent of Africa. Near Durban, South Africa, a sailor from the Quebec makes friends with a native child. . . . The Navy got its first jet aircraft. T-33 trainers and, later in the year, also other Bandeir fighters. . . . Three submarines, now based at Halifax, were loaned by the Royal Navy to provide practical

training for Canadian ships and aircraft. . . . Naval career opportunities for women were broadened with the establishment of a Women component of the regular force. . . . The anti-submarine destroyer escort, HMCS St. Laurent, was completed and commissioned in '55. All-Canadian designed and built, she is the most modern ship of her type in the world. . . . The custom of holding "open house" enabled thousands of persons in many parts of the world to visit Canadian warships, and thereby get to know more of Canada. With Table Mountain in the background, a Canadian sailor shows two Cape Town girls around the Quebec. — National Defence Photo.

SIGNAL ACHIEVEMENT—Joseph Dolinaj, Dunnellen, N.J., displays the crocheted signal tower which won him first prize in a nationwide crocheting contest. A railroad signal tower operator, Dolinaj began crocheting 11 years ago.

For about two dollars an Italian company will insure tourists against rain in Italy from May to October. Payoff for a week's rain is \$40. 3174

OUR COMPLETE SHORT STORY —

BLIND DATE

By FERN AUBLE

ROD, dear," Mary Trent paused at the foot of the stairs as the inevitable bang of the front door announced the unmistakable arrival of her 17-year-old son. No one else ever slammed a door quite like Rod.

She turned and came toward him, a surge of pride welling up as it invariably did when she looked at her tall son. The tight, black cap of curls with which he was everlastingly waging battle was rumpled with the fingers of the brisk wind and his black eyes danced with mischief as he slid to a stop before his mother.

"Hi-ya, Toots!" He grinned engagingly and threw an arm around her shoulders, giving her a quick kiss which brought a flush of pleasure to her cheeks.

"Oh, Rod," she said, laughing in spite of herself, "you're impossible."

He struck a pose and sighed heavily. "Is just me effervescent spirits, ma'am." Then he snuffed. "What's cookin', good lookin'?"

"It's chocolate cake and not a smidgen of it do you get until dinner. And that's final!"

Rod's sigh was highly exaggerated as he followed his mother into the living room, where he sprawled down into a chair, his long legs stretched out before him. He reached into a box of candy and crammed a piece into his mouth. Mrs. Trent said automatically, as she seated herself across from him, "Don't spoil your dinner, Rod."

She looked at him for a moment speculatively, wondering just how to broach the subject uppermost in her mind right now. She decided, to use a phrase of her son's, to just take the bull by the horns and get it over with. She was pretty sure to encounter some resistance anyway.

"Rod," she began and then stopped. Really, she thought, Charlie might have done this himself.

"M-M-M?" Rod looked at her with mild interest.

She plunged in, "Rod, dear, your father wants you to ask Mr. Billings' daughter to the Festival Dance."

Rod looked at her unbelievably and then bolted upright, indignation in every line of his lanky frame.

"What?" he exploded. "That dip?"

"You haven't asked anyone else yet, have you?" his mother asked anxiously.

"Not exactly, but I thought I'd drag Billy. Do I have to, Mom?"

"No, son, you don't have to, but it would be a very friendly gesture. After all, the Billings are fairly new here and Anna Marie, probably hasn't made many new friends yet."

"That I can believe," he muttered darkly, a mental vision of the daughter of his father's boss and his mother's employer flashed through his mind.

"Well, he's been seen just once, when he'd driven down town with his father one morning. Anna Marie had bought Mr. Billings down to the office and Rod had just got a glimpse of her as her father got out of the car. Her face was an unbecoming shade of lobster red and she had

some kind of greasy stuff all over it. Her hair had been tied up in a bandana so he couldn't tell whether she was a blonde, brunette or redhead. U didn't make any difference anyhow, that face had been enough to curdle milk. Evidently she had thought so too, for when she had seen Rod staring at her, she'd turned away quickly.

That night, at the dinner table, Rod's father had remarked laughingly, "Mr. Billings' daughter is sure a mess. She laid out in the sun yesterday and went to sleep. When she woke up, she was practically done to a turn." Rod had laughed and then promptly forgot all about it.

He turned to his mother now, despair darkening his face. "Did Dad tell Mr. Billings that I'd take her?" he asked, hopefully.

"I'm afraid he did Rod. I'm sorry, son, but after all, you haven't asked anyone else and your father wouldn't be pleased."

"Nuts!" He shoved his hands deep in his pockets and kicked at the rug disconsolately. "Oh, all right, she's a creep, but she'll tell me all my ails for the sake of the family."

The next three weeks sped by at an alarming rate. Rod, having called Anna Marie under pressure, reflected gloomily, as he dressed for the dance, "Oh, well, I can take her home early. She'll probably be glad to get home after no one asks her to dance." He yanked his tie into position and turned to leave the room.

A half hour later, he was ringing the Billings' doorbell. The door opened and a sweet-faced woman was smiling at him.

"Oh, you must be Rod," she said, opening the door wide. "Come in, won't you? Anna Marie will be down in just a minute."

Rod stepped inside and stood nervously waiting for Anna Marie to come down. He looked up quickly as a faint sound reached him. He literally stopped breathing and his stomach turned a flip as he beheld the vision of loveliness descending the steps.

The lobster-red face, smothered with grease, had miraculously disappeared, leaving a skin as smooth and creamy white as the petals of a newly opened magnolia. As the vision reached the bottom of the steps, he discovered that his hair caught up in a soft cluster of curls, was like a sheaf of sunbeams caught and held by the gardenias he had sent her, under pressure from his mother.

Her blue eyes were like confetti, laughing at the dazed look on his face.

"Hello," she said, shyly, and dropped her eyes in confusion at gesture. After all, the Billings are fairly new here and Anna Marie, probably hasn't made many new friends yet."

"That I can believe," he muttered darkly, a mental vision of the daughter of his father's boss and his mother's employer flashed through his mind.

"Well, he's been seen just once, when he'd driven down town with his father one morning. Anna Marie had bought Mr. Billings down to the office and Rod had just got a glimpse of her as her father got out of the car. Her face was an unbecoming shade of lobster red and she had

IT'S NOT CRICKET—To have a nose like bowler in background, that is. But the picture is strictly cricket. Good luck and a fast shutter caught him whopped by bowler, background, during Savannah Cricket Club match with the British Consulate team at Atlanta, Ga.

Canadian scientists preparing to probe some of the earth's unsolved mysteries

A group of Canadian scientists is busily preparing to probe some of the unsolved mysteries relating to the earth, sea and atmosphere of the Canadian portion of North America. As participants in the International Geophysical Year (IGY), a vast, international scientific investigation of this planet's natural phenomena, they will operate from temporary research stations set up across Canada during 1957-58.

The most ambitious of these events organized for meteorological, magnetic and auroral observations in north-polar areas and initiated during 1957-58, the IGY began as the First Polar Year. Scientists next carried out their co-operative observations during the Second Polar Year in 1957-58. Because the scope of the 1957-58 activities has been widened to include the whole globe rather than just the north-polar areas, the investigations now being planned have been renamed International Geophysical Year.

During the First Polar Year, British, German and U.S. expeditions occupied northern Canadian sites. Scientists from this country played a passive role at the time.

Canadian participation became active however, during the Second Polar Year and the scientists investigated a natural phenomenon from posts at Baker Lake, Chesterfield Inlet and Eskimo Point on the west coast of Hudson Bay.

The program was enlarged to include ionospheric investigations.

Co-ordinating the Canadian IGY program is Dr. Donald C. Rose of the Pure Physics Division of the National Research Council.

Supporting him in the planning and execution of activities are Frank T. Davies, of the Defence Research Board, a member at Canada's Second Polar Year expedition, Dr. C. S. Beak, Department of Mines and Technical Surveys, and Dr. D. W. R. McKinley, also of NRC.

Canada's program will include detailed studies of the earth's magnetism, the auroral borealis and the ionosphere. Investigations will be carried out from a series of main research stations at Resolute, Churchill, Ottawa, Montreal and Saskatoon. Supporting projects will be conducted at other points ranging from Agassiz, near Toronto, to Alert, the continent's most northerly community, on the tip of Ellesmere Island.

Churchill key station

Because Fort Churchill is the key station in the northern auroral zone, activities there will be extensive. In addition to being the geographic centre of Canada's IGY effort, the Manitoba military establishment is the crossroads for communication and transport in the north.

The Fort Churchill program will include U.S. Army rocket and guided missile launches into the upper atmosphere to obtain ionospheric data and measurements.

Extensive meteorology investigations aimed at a better understanding of polar storm centres, auroral studies involving an all-sky camera, and a neutron monitoring program relative to cosmic ray research.

In addition to the cosmic ray studies at Fort Churchill, Dr. Rose will direct further activities in this field from a high-altitude observatory to be constructed by NRC high in the Rocky mountains.

Plans for glaciological observations have yet to be completed by

the Canadian scientists. They expect, however, to co-operate with their opposite numbers from other nations in a vast survey of the extensive glaciation in Canada's northern areas.

Other actively participating Canadian agencies besides NRC and DRB will be the Dominion Observatory, the Department of Transport's Meteorological Service, the University of Saskatchewan and individual scientists from other universities.

Dr. Rose and his associates are now organizing scientific teams, completing arrangements for the establishment of observation stations throughout Canada and agencies concerned.

amassing the research equipment that will be used by the scientists and engineers.

The Canadian contribution will be financed by the individual agencies concerned. Additional financial support will be extended through grants to university personnel with specialized knowledge and training in specific related fields.

The isolated observation stations to be set up as temporary research laboratories will employ more than 50 Canadian scientists.

Their efforts will be supported by the staff and facilities of the various government and private agencies concerned.

Score first goal and win game pretty well borne out in NHL

There's been an old saying for years that went something like: "Score the first goal and win the game." It has been pretty well borne out in National Hockey League games played over the years that the team scoring the first goal usually went on to win the game.

After the first 67 games played this season, the club tallying the first goal went on to win the game 37 times. Two of these 67 games were scoreless ties, which means that out of 65 first goals scored 37 were won by the club leading the initial counter.

The team scoring the first goal lost 12 times, while on 16 occasions the club scoring first ended the game in a tie.

New York Rangers scored the first goal in the contest 11 times, winning nine of these, tying three and losing two. Chicago Black Hawks also scored the number one goal in a game 14 times, but the Hawks do not boast as successful a record as the Rangers. Out of the 14 times they scored first, the Hawks won six, tied six and dropped two.

Montreal Canadiens are another club that believes in getting off to a good start. The Canadiens actually have the best record for going on to win games in which they count the opening marker. Out of the 11 games in which the Canadiens tallied first, they ended up winning nine, tying one and losing one.

Five of the Toronto Maple Leafs victories were in games in which the Leafs tallied the first goal. The Toronto crew flashed on the red light first in 10 games and their record reads 5 wins, 2 ties and 3 losses.

Boston Bruins and Detroit Red Wings each scored first in eight little. Both clubs ended up with identical results, too. The Red Wings and Bruins both show four wins, two ties and two losses in the eight games in which they scored the premier goal of the night.

NEW CAREER

The man or woman who expects to retire within the next 10 years should set about preparing for the new era in their lives. Retirement may actually cause ill-health to a busy person who retires to complete idleness, so it is wise to experiment with ideas for hobbies or sparetime occupations that will take the place of the job it will also allow purchase of necessary equipment while there is still a full salary cheque.

3174

Canadian farm loans

The Canadian Farm Loan Board recently issued its twenty-sixth annual report covering operations for the year ended March 31, 1955. The board is a federal government agency established in 1929 to make long-term mortgage loans to Canadian farmers.

During the year a total of \$8,225,994 was approved for loans, of which 52.5 per cent was to buy and pay land-secured debt, 16.7 per cent to buy livestock, farm machinery and to make improvements, 28 per cent to pay debts and 3 per cent for sundry purposes. A total of 2,145 first mortgage loans and 395 second mortgage loans were approved, the average loan being \$3,837.

Interest due during the year totalled \$1,759,501 and borrowers had paid over 90 per cent of this amount by the end of the year. Principal repaid amounted to \$2,357,025 and over 56 per cent of this amount did not fall due during the year but was voluntarily prepaid.

At March 31, 1955, the board held loans on 18,111 farms throughout Canada for a total of \$30,120,336, the highest figure in the history of the board.

Farm Loan Board loans are available only to farmers actually farming the land offered as security and are made for such purposes as purchasing livestock and farm equipment, etc. Farmers may borrow up to \$10,000 on first mortgage at an interest rate of 5 per cent repayable over a period of 24 years or up to \$12,000 on combined first and second mortgages.

Strictly Fresh

You can really get a bang out of quitting smoking. Fellow in Knoxville, Tenn., reached into his pocket for a coffin nail. Pulled out a two-inch firecracker.

Yuletide note for bachelors: cooking under the mistletoe can lead to billing as "Mr. and Mrs." by the time next Christmas rolls around.

Fellow across the desk from us says his wife likes the turkey served very thin, the long way of the bird. Told her that the delicatessen does a fine job of such slicing. We're looking forward to having him at our house for dinner Christmas day.

Cyprus is the third largest island in the Mediterranean.

On The Side: E. V. Durling

In positions where rapid-fire decisions are required cigar smokers make the best executives. A good example of such a position is that of baseball manager. The average pipe smoker's mind moves too slowly for that job, while the average cigarette smoker is too nervous for it. The cigar smoker, with his steady nerves and rapid-fire thinking equipment, is just right for the position. Cigar smokers also make the best city editors because they can usually snap out the answers immediately. The pipe smoker has to juggle his pipe a little and reflect before telling a reporter what to do in an emergency.

How to make housewives happy

Those people specializing in geriatrics, the study of longevity, are trying to figure out ways of enabling people to live to a healthy old age. One specialist in geriatrics says that doing housework conscientiously and thoroughly makes a woman live longer. Call this to the attention of your wife the next time she refers to her housework as a difficult and tiring task. Tell her she is lucky not to have a maid to do the work as that would shorten her life.

"Sizing" up the tall men

There is a widespread belief that tall men are strongly attracted by little women. I don't think that is so. However, pete little women are undoubtedly strongly attracted by big men. The cute, little tricks are clever man conquerors much smarter than the tall girls in that respect. That is one of the major reasons why so many large fellows have little wives. Speaking of big fellows with small wives, I know of a man in Detroit who is six feet three inches in height and weighs 225 pounds. His wife is four feet, six inches in height and weighs 75 pounds.

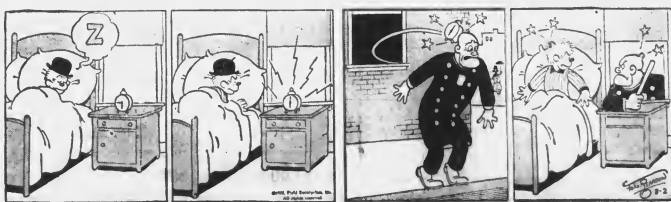

Presents with strings attached

The character of a man can be judged by the gifts he brings a young woman. If he comes bearing orchids, it indicates he is sophisticated and touched with cynicism. Also, he may be a bit of a wolf. If he brings roses it reveals he is romantic and has great faith in womanhood. He will not be very difficult to lure into matrimony. If he brings a hat it reveals he is a deep student of the feminine mind, a man of experience and probably an interesting companion. So say the experts.

"Weaker" when they want to be

Is it better to be born male or female? Insurance statistics reveal the females have all the better of it. They live five years longer than men. Also spend three-quarters of their husband's income and nine-tenths of any money they earn. Wearing more than women affects the health of the male. Many more of them die from heart attacks than women. The female sex has equal rights and in most activities rate equal pay. Yet they are still enjoying innumerable privileges based on their claim, that they are "the weaker sex."
